

Citymesh – Network Engineer

Here's What You'll Dive Into:

At Citymesh, we're not just a telecom company; we're a European leader in B2B connectivity. From 0G to 5G, we're reshaping the Belgian telecom market by offering innovative, lean, and tailored connectivity solutions for enterprises, cities, and industries.

Are you ready to elevate your career with a telecom pioneer that's reshaping the industry? Citymesh is on the lookout for a skilled **Network Engineer** to join our dynamic team.

As a Network Engineer, you play a key role in innovative telecom projects by applying your technical expertise to the rollout of (Mobile Private) Networks. You work closely with project managers, technicians, and external partners to ensure project goals are achieved smoothly and efficiently.

Your job in a nutshell:

- **Innovation:** You collaborate with the presales team to identify customer-focused IT opportunities that improve their telecom experience.
- **Project:** You work together with the project manager to execute and monitor IT projects, ensuring that the customer's requirements are fully met. You provide support both at the office and on-site at customer locations.
- **Design & Configuration:** During project execution, you provide technical support related to networking, including network design, configuration of network components (such as routers, switches, firewalls), and implementation of (Mobile Private) Networks.
- **Testing & Maintenance:** You are responsible for setting up, testing, documenting, and maintaining network solutions, ensuring accurate technical reports, configurations, and performance data.
- **Monitoring & Support:** You actively contribute to the security, monitoring, and optimization of network systems, and provide second-line support for incidents, backups, and recovery procedures.

These are your Talents:

- Preferable 3 years of experience in a relevant role (IT support, IT project management or similar), combined with strong knowledge of networking technologies and components such as IP networks, routers, switches, firewalls and BGP, including configuration and support. Motivated graduates will also be considered.
- An analytical and creative problem-solver who keeps the overview and comes up with innovative solutions for IT challenges in telecom projects.
- Driven and accountable with an entrepreneurial mindset; flexible and at ease in a dynamic, fast-changing sector.
- Fluent in Dutch and English; knowledge of French is a nice plus.
- Willing to work regularly on-site with customers; being based in Belgium is a strong advantage.

What Do We offer?

At Citymesh you will be part of an enthusiastic and ambitious team in which we greatly value your own input and believe in the growth of each of our employees.

We offer you a great opportunity to work for a fast-growing and innovative employer that operates as a challenger in the Belgian telecom market. Next to this, we also offer a wide range of benefits, including:

- Full-time permanent contract.
- Competitive compensation with an extensive package of fringe benefits, such as meal vouchers (€8/day), eco vouchers, health insurance, CAO 90 bonus, year-end premium, net expense allowance.
- Through our cafeteria plan, you can optimize your salary with multimedia, pension insurance, and more.
- A mobile phone subscription and the option to purchase home internet at a very affordable rate.
- Cruise around with your company car, including a fuel card or charging card. Not into cars ? No worries — our flexible mobility budget lets you choose the travel solution that fits your lifestyle best.
- Prefer some pedal power? With our bicycle leasing options you can ride into work like a pro cyclist.
- A chunky budget to not only level up your skills but to invest in your awesome self. We're all about employee growth and making you even more fantastic.
- An exceptionally contemporary workplace, where we prioritize a warm and people-centric atmosphere, ensuring that your daily experience takes center stage.
- You work 40 hours per week. But they really fly by here! And as a result, you get an extra 12 days off per year if you work full-time (this also depends on your type of contract: full-time or parttime).
- A healthy dose of foodie vibes: fresh fruit every Monday & homemade soup three times a week.
- Food brings us together: summer and winter BBQs with bring-your-own-meat, Friday fry breaks and cozy after-work drinks. And for the real foodies, there are regular sushi and pizza dates.
- Our company is a breeze to reach, right by the Oostkamp exit.
