

Citymesh – Program Manager

Your impact at Citymesh

As a Project Manager, you lead the successful delivery of telecom infrastructure and connectivity projects, focusing on Private Mobile Networks, LAN/WLAN solutions, and related applications. You coordinate all project phases from initiation to closing, aligning scope, timing, budget, quality, and stakeholder expectations. Working closely with technical experts, clients, and internal teams, you drive structured, efficient, and results-oriented project outcomes.

In this role you focus on:

- **End-to-end delivery:** from scope definition to final execution, you manage client projects within Private Mobile Networks and LAN/WLAN environments.
- **Connecting the dots:** acting as a central coordinator, you bridge the gap between clients, engineering teams, and technical specialists.
- **Stakeholder management and communication:** through clear communication and proactive follow-up, you maintain project momentum and tackle challenges effectively.
- **Project Management:** applying methodologies pragmatically, you balance structure and adaptability within a fast-moving technical setting.
- **Continuous growth:** you contribute directly to refining and improving our project delivery methodologies and processes.

What do you bring to the table

- At least 5 years of experience as a Project Manager or in a similar role, ideally within telecommunications or connectivity.
- Solid background in Private Mobile Networks or LAN/WLAN setups, along with a good understanding of complex technical client projects.
- Practical knowledge of project management frameworks and the ability to apply them in a structured, organized way.
- Sound judgment to make balanced decisions in a fast-evolving technical setting.
- Clear communication skills with the ability to interact smoothly with clients, team members, and technical experts in English, as well as Dutch or French.
- Strong organizational skills to manage multiple priorities simultaneously without losing sight of details.
- Experience leading project teams and working alongside technical specialists across multidisciplinary domains.
- Willingness to travel approximately 3 to 5 days per month based on project requirements.

What you get from us

At Citymesh, you'll join an enthusiastic and ambitious team where your input matters and where you have room to keep growing. A good job is about more than the role itself. Flexibility, time off, mobility and a solid salary package matter too. Here's what you can count on:

- A full-time permanent contract with an attractive salary package, including €8 meal vouchers per working day, eco vouchers, hospitalisation insurance, a CAO90 bonus, year-end bonus, net expense allowance and the annual sector premium under PC 200.
- A 40-hour working week, giving you 20 statutory holidays plus 12 additional ADV days each year. This ensures plenty of room for a healthy work-life balance.
- Flexible working hours and the possibility to work from home 2 to 3 days per week.
- A company car with fuel or charging card. Prefer another way of getting around? A mobility budget and bike leasing are also available.
- A flexible benefits plan that lets you shape part of your salary package, including options such as multimedia, pension savings and additional insurance.
- A free mobile subscription and the option to get your home internet through Citymesh at an absolute bargain price.
- Room to keep growing through internal workshops, external training and relevant certifications.
- A warm workplace with plenty of humour, the occasional bad joke, and an afterwork team that knows how to mix things up — from karaoke nights to boat trips and even a diving session.
- Food brings us together: fresh fruit on Mondays, tasty soup three times a week and fries on Fridays. And every now and then, pizza, sushi, after-work drinks or a barbecue make an appearance too.
- Our office in Oostkamp is easy to reach, with plenty of parking and charging points for electric cars.
